

## **Sixth Sense Launches to Fill a Gap in the Industrial Teams Market**

**CALGARY, Alberta** - SIXTH SENSE RESOURCES LTD. is officially in business as of May 2009. The company specializes in placement solutions for industrial teams requiring support personnel, permanent and contract, within the construction, energy and infrastructure sectors across Alberta. Sixth Sense primarily focuses on placing candidates in the Purchasing / Procurement, Document Control / Data Management, Material Management, Projects Control and Technical Writing roles.

Co-founders Don Quist, Karen Sutherland and Ken Wicks created the company because they saw a need for a different kind of staffing agency. Sixth Sense—as a subsidiary of Hood Managing Partners Inc.—aims to reinsert an emphasis on both individual and interpersonal relationships into a corporate world that has lost the personal touch. For the founders of Sixth Sense, a fundamental part of the staffing process is getting to know the client's specific needs. Sutherland explains: "By developing a personal relationship with our clients, we look to find the right candidate who not only has the required experience but will also fit well in the organization's culture; we look beyond the resume."

Together, Quist, Sutherland and Wicks bring extensive personal experience to each of the sectors and roles on which the company is focused. "We have spent years in a position similar to yours; we have spent hours looking for the same talented individuals that companies seek", says Quist. Hence Sixth Sense Resources' slogan: "We Know." With experience spanning from Western Canada to the offshore Eastern Canadian coast and overseas, the founders' vision is not only to place the right individual in the right position but to develop a company that delivers highly functional, specialized teams with the proven ability to get the job done and creates lasting financial returns for the client.
